

Provider Tip of the Week

August 3, 2022

Water Safety

Tips to share with families around water safety:

1. Anytime a child is around water, an adult should be within an arm's reach.
2. Not all flotation devices will keep children safe. Make sure to use a US Coast Guard-approved flotation device anytime a child is in the water.
3. Starting swim lessons can greatly reduce a child's risk of drowning.
4. It is never OK to leave a baby alone in a bathtub, even for a minute. Before starting the bath, adults should make sure they have everything they need.
